FOREWORD

Upon the lifting of the enforced curtailment of major capital improvements, and even adequate maintenance, at the end of World War II, the State was confronted with a sizeable backlog of needed projects to bring its physical plant up to a point of adequacy. The required modernization and replacement of facilities, and the provision of new ones to meet increased demands, compelled the State to undertake a heavy construction program.

The report that follows spans the twelve-year period, 1947-1958, and indicates the extent of the program to overcome the critical deficiencies. It discloses that during this period the expenditure of more than \$177,400,000 has been authorized by the General Assembly for capital improvements, exclusive of highways. In addition to summarizing the authorized expenditures by major functions, as well as presenting a tabulation of legislative fund authorizations, the report sets forth, by agency and institution, a detailed compilation of all projects that have been authorized during the twelve-year period. The charts on the following pages show the authorized expenditures for capital improvements (1) by basic function and (2) by major agency or institution.

It is hoped that this report will serve as a useful reference and be helpful to State officials, legislators and others in the consideration of future capital improvement programs of the State.
